Our members first learned about HEB on Aug 24th and HEB was Featured on our websites including this website on Aug 27th,

Hemispherx Biopharma | HEB | Profile | Summary

Hemispherx Biopharma ([HEB](#)) is a biopharmaceutical company engaged in the manufacture and clinical development of new drug entities for treatment of viral and immune-based disorders.

Hemispherx's flagship products include Alferon

N Injection® and the experimental immunotherapeutics

/

antivirals

Ampligen

®.

Hemispherx's platform technology includes large and small agent components for potential treatment of various severely debilitating and life threatening diseases.

Hemispherx

has an extensive number of patents comprising its core intellectual property estate and a fully commercialized product (

Alferon

N Injection®). The Company wholly owns and exclusively operates a

GMP

certified manufacturing facility in New Brunswick, New Jersey.

ALFERON

Alferon N Injection® is the company's registered trademark for its injectable formulation of Natural Alpha Interferon, and is approved by the FDA for a category of STD infection.

Alferon N Injection® (interferon alfa-n3

human leukocyte derived) is a highly purified, natural source, glycosylated

,

multispecies

alpha interferon product, composed of eight forms of high-purified alpha interferon.

Alferon LDO® (Low Dose Oral) is a new experimental drug delivery platform for the Company's highly purified, natural source alpha interferon.

ALFERON N Injection® is the only highly purified, natural-source, multispecies alpha interferon product currently sold in the U.S. and is also approved for sale in Argentina.

Clinically Effective:

-

All warts disappeared in 54% of patients.³

-

No recurrence in 76% of complete responders at follow-up. ³

-

Completely cleared 73% of all treated warts. ^{3,4}

-

No human antibodies to interferon alfa-n3 detected in clinical trails. ^{3,4}

-

Provides a spectrum of multiple alpha interferon subtypes. 1,

What's in the Pipeline?

Ampligen® (poly I:poly C₁₂U) is a synthetic specifically configured double-stranded RNA containing regularly

occurring regions of mismatching.

Ampligen

® and

Oragens

® experimental nucleic

acids are being

developed for the

potential treatment of

globally important viral

diseases and disorders

of the immune system

**including
HPV
, HIV, Chronic Fatigue
Syndrome (
CFS
) , Hepatitis and
influenza.**

Watch This!

On July 31, 2012 Hemispherx submitted its complete response to the FDA's Complete Response Letter in

support of Ampligen ®'s New Drug Application for Chronic Fatigue Syndrome (“CFS”).

**Its too early to tell
what the FDA's**

**response would be,
however, the
response from
investors**

**has been very
positive. We alerted
our members and
followers last week
and we believe this
company should be
on your radar!**
