

Dalton Industries, DALT, Profile, Summary

Dalton Industries (DALT) , conducts research and development in the Visual FX, Games and Digital Content Creation industries. Over the years we worked on a variety of feature film, television and game productions creating pipelines, CG art and providing supervision and consultation services in these areas. Dalton aslo makes tools, both hardware and software for users who work in these areas, leveraging their knowledge and experience into commercial products.

Dalton Industries Inc., has been working with various tools and devices related to the Virtual Reality and Augmented Reality industries for the last 2 years. Yet our research efforts go back to the dawn of Virtual Reality in the early 1990s, building our own head mounted displays.

The company is currently working on two software products for commercial release that relate to the [Oculus Rift](#)

Virtual Reality Head Mounted Display Device and [Leap Motion's](#)

Leap Controller for use with content creation packages popular in the Visual FX, Games, 3D Animation and Audio production industries.

Dalton Industries continue to invest in Research and Development with software products as well, such as the highly acclaimed and heavily used UberCam for

LightWave3D

. Originally intended exclusively for our own use, UberCam

is now one of our most successful tool based products sold through Liberty3d.com. This is a common pattern for us. We build these tools to help us in our work on productions for clients as well as our own projects eventually turning them into commercial products retailed to the industry.

From stereoscopic virtual cameras to character animation and modeling tools in Computer Graphics, our products are being used by artists worldwide. Chances are that if you are a fan of sci-fi and have been watching TV and movies over the last decade you have seen shots that were created using our tools and methodologies.

With the increasing dependence of productions on Visual Effects and Digital Content Creation Tools, Dalton is committed to Research and Development of next generation technology and products in these areas has never been greater.
