SATC | [Satcon](#) | **Profile** | **Summary**

Satcon Technology Corp., SATC , based in Boston, is one of the leading manufactures of large Utility Scale Converters. The converters/inverters

are used to convert the 'Green' renewable DC energy generated by the Solar Panels in to AC Power.

Satcon, SATC, is a total power solution company, provides an interface with the local Utility Grid, Energy Storage and the End User applications. The company also developed micro-grid solutions that offer **uninterrupted** renewable energy security.

The company has manufacturing facilities in the US and China and markets its products here in the USA and Internationally.

The stock is not far from its **52 WK highs** that makes it so much interesting, so we think this stock deserves a closer look and perhaps a place in the portfolio.
