LPTH- LightPath Technologies, manufactures optical components and assemblies. The company's products are used in defense products, medical devices, laser aided industrial tools, automotive safety applications, bar-code scanners.

Keep an eye.

FCEL- FuelCell Energy, makes high temperature fuel cells for clean electric power generation. The company's proprietary carbonate Direct FuelCell Power Plants that electrochemically produce electricity from hydrocarbon fuels, such as natural gas and biogas.

Its fuel cells operate on a range of hydrocarbon fuels, including natural gas, renewable biogas, propane, methanol, coal gas, and coal mine methane.

Looks very attractive, Speculative.
