Stocks to Watch, Wednesday 08-24-2011

SATC- Satcon Technology, provides utility-grade power conversion solutions and system design services for the renewable energy sector, primarily for large-scale commercial and utility-scale solar photovoltaic (PV) markets. **The beaten down Solar sector is slowly surging, this could be a good entry point for Satcon.**

BAC- Bank of America – America's Largest Bank at 50% OFF, sounds like one of the Daily Deals you see for a soothing, refreshing massage from your local massage parlor. However, If you gotta stomach with steel lining and don't suffer from heartburn, this could be a strategic trading stock.
