**DSTI - DayStar Technologies**, engages in the development, manufacture, and marketing of solar photovoltaic products to the grid-tied and ground-based photovoltaic markets.

The company offers solar photovoltaic modules to convert sunlight into electricity. It provides monolithically integrated copper indium gallium selenide modules on glass laminate substrates for centralized utility power plants, commercial building roof tops, and smaller residential roof tops.

**52WK**

**LOWS, Attractive, short term.**

**SATC - Satcon Technology** provides utility-grade power conversion solutions and system design services for the renewable energy sector, primarily for large-scale commercial and utility-scale solar photovoltaic (PV) markets. The company designs, produces, and delivers a range of power conversion solutions that enable large-scale producers of renewable energy to convert clean or renewable energy sources into grid-connected electrical power.

Satcon also offers system design services for management, monitoring, and performance measurement to improve overall quality and performance over the entire lifespan of an installation. **Very Attractive, Bouncing Back, keep an Eye!**
