

Stock to Watch!

Micro Vision, Mega Gains! (MVIS)

Micro Vision develops miniature laser display and imaging engines, The company's proprietary PicoP display engine technology uses two dimensional micro-electrical mechanical systems, lasers and optics to create a video or still image.

[Micro Vision's](#) products include Pico projector displays for portable hand-held devices, smart-phones, mobile phones and laptop computers.

[MVIS](#) also makes high resolution image displays, GPS mapping systems and audio controls used in cars today. In addition to consumer electronics Micro Vision products are used in medical and defense industries.

We think the stock at \$0.35 cents is undervalued, oversold, could bounce back, it should be on your list.
