Stock to Watch

Monday morning Mergers sent Bulls bargain hunting, Major Indexes looks like will remain in Green today. One of the well known fashion Brands (TLB) has fallen on hard times and, the stock is trading not far from its 52WK Lows. **We think TLB could be interesting to watch.**

TLB - The Talbots is a specialty retailer and direct marketer of women's apparel, accessories, and shoes in the United States and Canada. The company offers its merchandise under misses, petites, and woman petite sizes. It also sells accessories, fashion jewelry, scarves, handbags, and footwear.
